Capo 1

Verse 1
```
Em                          C                          D
    You noticed everything, you noticed every part
                             G                          C
I'm stuck between the lines and outlooks in my mind
      D                A          D
You see that I'm a lie, I'm a lie
```

Chorus
```
          C        D
You're never changing
            Em    D
You're always perfect
     C        D
And I am hanging
      Em       D
I'm waiting, waiting
     C                 D
For You to move, You to do
D/D#        Em  D        C   D
What You promised to do
```

Verse 2
```
Em                                C                          D
    See I'm counting all the ways that I've been hesitating
                          G
With every step that I can't take
               C                 D
Though my efforts seem sufficient
                 A       C
They're just veils to you
             G  D                   A
So I'll be honest and say my faith is loose
          D
It lacks you
```

Bridge:
Em – D – G – C (x2)
Em – D/F# - G – C – Em – D – C - D
